DALTON M. BROWN

Eminent Southern Biologist and Horticulturist

Dr. Brown's lectures and informal talks are based on his years of personal experience in all fields of horticulture. Now head of the Biology Department, State Teachers College, Johnson City, Tennessee, Dr. Brown is recognized for his outstanding achievement in connection with the Roan Mountain Rhododendron Gardens. Through his enthusiastic publicity and tireless research he is largely responsible for the gardens having been recently acquired by the United States Forest Service.

An instructor and author by profession, Dr. Brown is a versatile hobbyist, interested in color photography and orchid culture. His orchid hobby, combined with his horticultural background, has caused him to visit orchid collections in many parts of the United States.

Dr. Brown combines technical knowledge of orchid culture with practical experience, having grown and potted many plants himself. It is with pride that Rivermont Orchids announce Dr. Brown's association with our company this summer. He will be available for a limited number of lectures and informal visits with orchid societies and groups of orchid hobbyists throughout the Southeast.

Dr. Brown is a member of the following organizations:

Phi Sigma Biological Fraternity
Alpha Zeta Agricultural Fraternity
American Association for the Advancement of Science
The Ecological Society of America
Torrey Botanical Club
Association of Southeastern Biologists
East Tennessee Educational Association
Tennessee Educational Association
American Orchid Society
Tennessee Academy

ORCHIDS

SIGNAL MOUNTAIN, TENNESSEE

The enclosed circular has been sent to all orchid societies in the Southeast. Since we realize that many of our customers are geographically remote from a society, we are sending the circular to all our active customers in the area.

If you and a group of your friends feel that you will not be able to hear Dr. Brown at a regular society meeting, a special visit can be scheduled for any group of ten or more interested orchid hobbyists. Dr. Brown's schedule is outlined below. Write us for further information and specific dates if you are interested.

Tennessee and Kentucky

1 week, beginning June 11th

Virginia, Maryland, North Carolina, and Washington, D. C.

2 weeks, beginning June 18th

Georgia, South Carolina and Florida

3 weeks, beginning July 2nd

Alabama, Mississippi and Louisiana

1 week, beginning July 23rd

GENERAL MOUNTAIN TENNESSEE

The encyclopedic collection has been sent to all
Geological societies in the Southern States. Since
we realize that many of our colleagues
are geologically removed from a society,
we are sending the collection to all our ac-
tive correspondents in the state.

If you send a check or your bill comes first
you will not be able to hear Dr. Brown in
a regular society meeting as he will always
be occupied for the first half hour of the
meeting in his office. Dr.
Brown's schedule is continually posted. He
has got to keep his office open
as far as possible to receive
visitors in the evenings and evenings
as well as in the afternoons.

Tennessee and Kentucky

1 week beginning June 1st

Aridius, Mississ and North Carolina and

C.

Massachusetts, D.C. 5 weeks beginning June 18th
